

# Local Swagelok Support Line Card

Having components you trust is essential to operating safe, reliable fluid systems. Having local support you trust is crucial too. Learn how our local fluids system specialists can support you.

## Equipment Assembly

We fabricate custom fluid system assemblies in our Fremont shop. With certified technicians and large local inventory, we provide safe, reliable, economical solutions. Design, testing, and warranty included. [View more examples at our website.](#)

### Analytical Subsystems

Choose from standardized, highly configurable designs, including Fluid Distribution Headers, Fast Loop Modules, Sample Probes, and others. [More](#)

### Hose Assemblies

Combine any of 22 types of hose with 89 end connection options. Get exact copies on demand in future. Pressure testing of every hose is included. [More](#)

### Gas Distribution Modules

Choose from dozens of standardized yet highly configurable designs to ensure safety, efficiency, and use of all gas in bottles. [More](#)

### Orbital and Manual Welding

Delegate fabrication of small-bore tubing systems to our certified technicians. Consistent results, documented quality, ASME Section IX, AWS D18.1 compliant.

### Grab Sampling Systems

Choose from 15 standardized, highly configurable designs for safe, efficient sample capture. Each is available with a variety of advanced features. [More](#)

### Seal Support Assemblies

Get equipment that delivers gas or liquid to a seal's operating environment, helping it perform better and last longer. All designs meet API 682 standards. [More](#)

## Field Engineering

Put Swagelok Northern California's Field Engineering Team alongside your team. Together we will improve fluid systems at your facilities, so you get better performance at lower cost. [See more examples at our website.](#)

### Compressed Gas Leak Detection

Find leaks, see what each leak costs, and know the cause of each leak. Get detailed advice on how to prioritize, tighten up, and save. [More](#)

### Hose Advisory

Find out how to enhance your hose selection, installation, inspection, and maintenance. We help you extend hose life, minimize repairs, and save. [More](#)

### Fluid System Evaluation

Have our Field Engineers assess and advise on how to get better performance, lower energy consumption, and more. We help you prioritize and save. [More](#)

### Sampling Systems Evaluation

Improve sampling accuracy and reliability with in-depth analysis and consulting on every component and subsystem, from process tap to analyzer. [More](#)

### Gas Distribution Program

Have our pressure control specialists inspect existing systems, and provide detailed advice on how to improve safety, performance, and efficiency. [More](#)

### Steam System Evaluation

Reduce energy consumption and safety risks with detailed advice from Field Engineers specialized in steam for oil/gas, chem, semi, and other sectors. [More](#)

# Application Support | Team Training

Our local team includes engineers, technical support gurus, assembly technicians, procurement experts, and others. We strive to integrate all our capabilities to deliver total solutions to you.

## Advancing Clean Energy Projects

Put our local Swagelok Field Engineers specialized in clean energy applications alongside your team. Together we will accelerate production, reduce labor costs, and ensure your project success. [Learn more here.](#)

### Hydrogen-Compatible Parts

Swagelok offers a range of ball, needle, and check valves suitable for hydrogen service, along with a complete portfolio of additional components.

### Rapid Solutions Capability

When projects meet several criteria, we can accelerate work so that RFQ-to-shipment takes just 1-5 days. Please [contact us](#) to discuss your needs.

### Hydrogen Application Support

We help hydrogen producers, hydrogen infrastructure developers, vehicle manufacturers, and others meet the challenges of working with hydrogen.

### Pre-Bent Small Bore Tubing

We offer precise, quick-turn CNC bending of tubing in a range of surface finishes, materials, diameters, and wall thickness. Documented and warranted.

### Equipment Assembly

We design and build CNG priority panels, fuel line integrations, dispensing systems, heavy duty refueling boxes, and more. All tested, documented, and warranted.

### Alternative Fuel Service Valves

With working pressures to 6000 psig, our AFS ball valves handle demanding applications like fueling stations. Certifications include ANSI/NGV.

## Training Your Team

Reduce errors, lower operating costs, and improve efficiency. Earn Swagelok Certificates of Completion. Choose from options listed below or design a custom training program for your team. [View details here.](#)

### Tube Fitting Installation

This two-hour seminar teaches techniques to prevent most leaks. It is for those who procure, design, install, inspect, or maintain tubing systems.

### VCR Face Seal Fittings

This seminar covers design elements of face seal fittings, welding procedures and precautions, issues with ultra-high purity systems, installation, and more.

### Tube Bending Fundamentals

This two-hour lecture-lab is for anyone responsible for designing, installing, inspecting, or maintaining leak-free tubing systems or tubing system components.

### Advanced Tube Bending

Learn the Swagelok method of tube bending, how to make offset bends, how to make segmented bends and rolling offsets, and distance between bends.

### Orbital Welding Training

This 4 or 5-day lecture-lab is for welders with or without orbital welding experience, supervisors of orbital welding, engineers, and quality control pros.

### Custom Team Training

The right training can quickly pay for itself. Bring Swagelok training to your facility or train your whole team in the Swagelok Northern California training room.

# Technical Support | Product Selection

We provide advice when and how you need it. We can visit your site, conduct virtual inspections, collaborate by video and phone, exchange files, or meet you in our Customer Briefing Centers.

## Support Services

We have helped California and Nevada plant managers save their businesses millions through remote managed inventory, auto-replenishment, custom kitting, and other assistance. [Learn more here.](#)

### Product & Materials Selection

We offer product selection and ordering help by phone, online, and in Customer Briefing Centers. Use our CAD files, sales drawings, and other tools. [More](#)

### Emergency Support & Parts

Our customers operate around the clock, and we staff our phone line 24x7x365. For urgent matters [call 510-933-6200](tel:510-933-6200) and use the "emergency service" option.

### Packaging & Kitting

From clean room packaging and custom kitting to answering questions during installation, our local team is ready to help your team simplify and save. [More](#)

### Tool & Equipment Rentals

Rent items for fluid system fabrication, assembly, installation, maintenance, and repair. Rent coning tools, orbital welding systems, swaging tools, etc. [More](#)

### Remote Managed Inventory

Put our team alongside yours to lower inventory costs. We can help reduce stock levels and transactions, plus enhance supply chain visibility. [More](#)

### Other Customer Support

Swagelok is a values-based company committed to quality, customer focus, continuous improvement, integrity, respect, and innovation. [More](#)

## More Ways We Can Help

Our team includes fluid system engineers, trainers, support specialists, and technicians devoted to helping busy customers run safe, efficient fluid systems and operations. We invite you to [explore capabilities at our website.](#)

### Process Fluid Sampling

Put our Field Engineers with advanced sampling systems specialization alongside your teams to ensure peak performance. [More](#)

### Semiconductor Fabrication

Put our local semi applications experts alongside your teams to boost control and efficiency in sensitive fabrication processes. [More](#)

## Contact Us

### Swagelok Northern California

Headquarters and Will Call

3393 W Warren Ave Fremont, CA 94538

Phone: [+1-510-933-6200](tel:+1-510-933-6200)

Customer Service: 7am-5pm Mon-Fri

Will Call Hours: 7am-4pm Mon-Fri

Swagelok Northern California provides Swagelok products and local fluid system engineering services in a 58-county region (in green on this map) of northern California and northwest Nevada. We invite you to explore guides, articles, videos, catalogs, and other resources at our local website. If we can help you in any way, please [contact us.](#)
